<i>Wisconsin</i>	7	43	8
<b>TOTAL</b>	<b>284</b>	<b>284</b>	<b>206</b>

## **ProTECT and POINT WebDCU™: Recording Local Time of Randomization on the Randomization Form**

The local time of randomization is the local time at your site when a drug kit number is assigned. For most cases, this will be the minute that you submit the randomization form (submitting the form will assign a drug kit number). **NOTE:** If you save the randomization form, but do not immediately submit the form, you should update the time of randomization immediately before submitting the form. If the hotline is used to perform the randomization due to WebDCU being down or another issue, the local time of randomization is when direction is provided by the hotline as to which study drug kit to use.

## **ALIAS2: New Study Drug Kits and Required Training**

New kits contain **TWO 500ml bottles** of study drug. The following are **required** in order to receive new kits: **1.** All Primary Study Coordinators **must attend ONE** teleconference to review the new kit configuration. It is strongly encouraged for all ALIAS study team members to attend. **NO NEW STUDY DRUG KITS WILL BE SUPPLIED TO ANY SPOKE UNLESS THE PRIMARY STUDY COORDINATOR HAS PARTICIPATED IN A NEW KIT TRAINING TELECONFERENCE.** Teleconference dates: 8/4/11 at 10:00am (EDT) **OR** 8/11/11 at 2:00pm (EDT). **2.** Each spoke PI must ensure that in-servicing on the new study drug kit configuration has taken place; and then complete and sign an attestation verifying the appropriate training was done.
