SEPTEMBER 2009

Bonus RAMPART Reminders for EMS

After determining a seizing patient qualifies for RAMPART and selecting the correct dose bundle:

*Medics should give the IM autoinjector, then start the IV and give the IV study dose ASAP.

DO NOT wait to see if the autoinjector study med works.

*When the seizure stops, declare it, and then you are done with the study meds.

*If the seizure stops before the IV dose is given, declare that the seizure has stopped and DO NOT give the IV study med. DO NOT give the IV study med, even if the patient starts seizing again and did not get it the first time. If a patient does start seizing again and needs more meds, use the rescue meds in your local protocol.

RAMPART Reminders for Post Enrollment

*Complete CRFs within the specified time frames.

*Remove the SD card, return it to the plastic case, label the case with the Subject ID number, and package it in the shipping materials provided by the CCC.

*Ship the SD card to the CCC ASAP.

*Email the date of shipment & tracking number to:

rampart-studybox@umich.edu.

*Reconcile the study box and study drug in WebDCU™.

*Reset the study box by pressing on the Reset button for 1 to 2 seconds, add new batteries (using quarters for a secure fit), a new SD card, and new drug.

*If you need shipping supplies and labels, please send an email to rampart-studybox@umich.edu.

Enrollment Update: **ALIAS**

As of 9/29/09
